

Safety Data Sheet

According to Regulation (EC) No 1907/2006

Elaboration date: 03.10.2012
Update date: 02.02.2017

Edition 3

Section 1. IDENTIFICATION OF THE MIXTURE AND OF THE COMPANY	
1.1 Product identifier	ATLAS WODER DUO (component B – liquid)
1.2 Relevant identified uses of the mixture and uses advised against	Liquid component of two – component waterproof insulation, recommended as under-tile waterproofing of terraces, balconies, wet rooms and foundations sealing. Forms waterproof and watertight insulation (light, medium and heavy type) – forms sealing against water: under pressure, infiltrating, not – dumping and dumping and pressure – less. Used as protection from water of cement and cement – lime plasters, cement subfloors, concrete, ferroconcrete, walls of bricks, hollow blocks, blocks, plasterboards, etc., indoors and outdoors. <i>Detailed information concerning the use, properties and instruction for use of the mortar are listed in the technical data sheet/product catalogue. The usage not listed in the ATLAS Sp. z o. o. documents should be previously consulted with a company representative.</i>
1.3 Details of the supplier of the Safety Data Sheet	ATLAS Sp. z o.o. Św. Teresy 105, 91-222 Łódź, Poland telephone: +48 42 631 89 45 fax: +48 42 631 89 46 Person responsible for the Safety Data Sheet: msds@atlas.com.pl
1.4 Emergency telephone number	112 – alarm number for mobiles and land line phones 999 – emergency 998 – fire service 997 – police +48 800 168 083 – available Monday – Friday from 8.00 am till 4.00 pm, outside office hours information can be left on the answering machine

Section 2. HAZARDS IDENTIFICATION	
2.1 Classification of the mixture	Product is not classified as hazardous.
2.2 Label elements	P102 <i>Keep out of reach of children.</i> LABEL: <div style="border: 1px solid black; padding: 2px; width: fit-content;">Keep out of reach of children.</div>
2.3 Other hazards	According to Annex XIII of REACH Regulation on PBT and vPvB, the mixture does not meet the criteria for PBT and vPvB.

Section 3. COMPOSITION/INFORMATION ON INGREDIENTS	
3.1 Substances	Not applicable.
3.2 Mixtures	Mixture of water dispersion of synthetic resins, antifoaming agents and preservatives.
3.2.1a Dangerous components	No
3.2.1b Substances with specific highest allowed concentration at workplace according to EU	No
3.2.1b Substances with specific highest allowed concentration at workplace according to EU	According to Annex XIII of REACH Regulation on PBT and vPvB, the mixture does not meet the criteria for PBT and vPvB.
Other information	<ul style="list-style-type: none"> For the classification of the product the actual content of hazardous ingredients was used. Shelf life period in conditions as listed in Section 7 is 12 months from the manufacturing date shown on the packaging.

Safety Data Sheet

According to Regulation (EC) No 1907/2006

Elaboration date: 03.10.2012

Update date: 02.02.2017

Edition 3

Section 4. FIRST AID MEASURES

4.1 Description of first aid measures	<p>After inhalation: Move injured person to fresh air and observe, in case of breathing difficulties, dizziness, nausea or loss of consciousness get medical assistance immediately. In case of inhibition of breathing apply assisted ventilation or artificial respiration.</p> <p>After skin contact: Remove contaminated clothing. Rinse the place exposed to mixture action with water and then wash with soap.</p> <p>After contact with eyes: Do not rub eyes. Rinse immediately with plenty of water within min. 15 minutes, keep the eyes wide open during rinsing. Remove any contact lenses. Contact an eye specialist.</p> <p>After ingestion: Do not induce vomiting. Do not give anything orally. Get medical attention.</p>
4.2 Most important symptoms and effects, both acute and delayed	The results of action of alkaline products onto living tissues, in opposition to acids, is always delayed, therefore avoid prolonged and direct contact of the ready – to – use mix with skin, eyes and airways. Follow remarks concerning safety and use shown on the label. Immediately remove product from skin, eyes and mucosae, which allows to prevent any delayed exposure effects.
4.3 Indication of any immediate medical attention and special treatment needed	In case of any symptoms of concern get medical assistance immediately, show safety data sheet, packaging or label. Do not let the mixture dry, wash immediately. In case of contact with eyes or mucosae medical consultation is recommended. Access to running water is recommended. Use protective creams in case of repeated or long term contact with skin.

Section 5. FIREFIGHTING MEASURES

Each employee should ask information concerning fire hazard at his worksite and closest environment. Worksite should be kept in due order. Flammable products must not be kept close to electrical devices, heaters and other sources of fire. In case of fire one should immediately, by all means, alarm people in the risk zone and call fire service (see: section 1.4) giving information essential for firefighting commencement (give the event site – full address, what is burning or what type of threat occurs, is there threat for human life, telephone number from which one is alarming as well as name and surname).

Next, using local extinguishing media, start firefighting and help people at risk, if necessary, start evacuation of people and property. These actions should be executed so that there is no start of panic, which can seize people at risk caused by fire and smoke. Panic can lead to unwanted and taking their toll accidents during rescue and firefighting actions. That is why when carrying any actions in case of fire one should give careful consideration when taking a decision. Until fire service comes the action is led by a particularly appointed person. Remember to protect the airway from smoke by using damp cloths and to move in bottom parts of rooms of high smoke level.

5.1 Extinguishing media	<p>Suitable extinguishing media: Foam, dry powder, sand, carbon dioxide, water – spray stream</p> <p>Unsuitable extinguishing media: Do not use water in full stream.</p>
5.2 Special hazards arising from the mixture	In case of fire hazardous gases (CO ₂ , CO) can form, in particular burning conditions forming of other hazardous substances is not unlikely.
5.3 Advice for firefighters	One should wear full set of protective clothing and individual breathing apparatus. Do not lead water from firefighting into aquatic environment. Use water stream to cool surfaces exposed to fire action.

Section 6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures	<p>For persons not belonging to staff applying aid:</p> <p>One should estimate situation, make sure if there is no further danger to any people nearby (victims, ones applying aid, etc.), if needed, secure the incident site and call for help. Avoid contact with spilled, liberated material. Remove contaminated clothing immediately. Isolate the leakage, if possible without undertaking individual risk. Use proper container in order to prevent the contamination of the environment.</p> <p>For persons applying help:</p> <p>One should check if a victim responds to stimulus. If the victim is unconscious, immediately open the airway by gently tilting the head back and gently lifting the chin</p>
--	--

Safety Data Sheet

According to Regulation (EC) No 1907/2006

Elaboration date: 03.10.2012
Update date: 02.02.2017

Edition 3

	<p>forward. Check if the person breaths (feel for the person's breath on your cheek).</p> <ul style="list-style-type: none"> - If the victim breaths normally place the person in the recovery position and check one's breath regularly. - If the victim does not breath start the cardiopulmonary resuscitation (CPR): Place the heel of one hand over the center of the person's chest, between the nipples. Place your other hand on top of the first hand. Keep your elbows straight, and push straight down on (compress) the chest at least 2 inches (approximately 5 centimeters). Push hard at a rate of about 100 compressions a minute. After 30 chest compressions, open the person's airway and give two rescue breaths (pinch the nostrils, open the mouth keeping the chin lifted and, after taking deep breath, tightly sealing victim's mouth, blow air into lungs). If the victim's chest does not rise one should examine the mouth to make sure no foreign material occluding the airway is inside, remove it immediately, and check if the head is tilted enough and chin lifted. Continue chest compressions and rescue breaths in ratio 30:2 until emergency personnel take over or the victim starts breathing by oneself. <p>If at incident site there is none available to give rescue breaths, then provide chest compressions only.</p> <p>In case of choking one should encourage the victim to cough, and in case of serious choking bend the victim forward and give up to 5 blows between the shoulder blades with the heel of your hand.</p>
6.2 Environmental precautions	Counter release of greater volume of material into environment (sewage system, ground or surface water and soil) by using self – contained sewage systems, allow to gather, in case of breaching, without possibility of its passing into environment (backup sewage system, self – contained), use of backup reservoirs or backup packaging.
6.3 Methods and material for containment and cleaning up	For small mixture leakages – transfer to labelled, sealed container in order to regain or dispose the product safely. Absorb the remains with absorbing material (sand) and dispose appropriately. Remove contaminated soil. Large leakage – collect mechanically or with the use of appropriate absorbent and pass to destruct. Guidelines concerning spilled material disposal shown in Section 13.
6.4 Reference to other sections	Individual protection measures: section 8 Waste treatment: section 13

Section 7. HANDLING AND STORAGE

7.1 Precautions for safe handling	Avoid contact with skin and eyes. Prevent penetration to the environment. Do not eat and drink during work. Wash hands after use. Remove contaminated clothing and protective measures before entering places designated for eating.
7.2 Conditions for safe storage, including any incompatibilities	Keep in sealed original and labelled packages. Keep in dry and cool place, protect against high temperature (above 30 °C) and freezing – the product freezes and irreversibly loses its performance in temperature below 0 °C. Protect against direct sunshine. Incompatible materials: not applicable.
7.3 Specific end uses	Use in accordance to occupational health and safety regulations. Provide proper ventilation, especially in closed rooms. Detailed information concerning the use, properties and instruction for use of the mortar are listed in the technical data sheet/product catalogue. The usage not listed in the ATLAS Sp. z o. o. documents should be previously consulted with a company representative.

Section 8. EXPOSURE CONTROLS/ PERSONAL PROTECTION

8.1 Control parameters	In case of occurrence in the mixture of ingredients listed in section 3.2.1 according to Minister of Labour and Social Policy Regulation of 6 June 2014 concerning maximum allowable concentration and intensity of health harmful factors at workplace (Dz.U.2014 no 0 pos.817), monitoring at workplace is obligatory.
• TLV and STEL	Not applicable
• MABC	Not defined
• monitoring	Minister of Health Regulation of 2 February 2011 on testing and measurement of

Safety Data Sheet

According to Regulation (EC) No 1907/2006

Elaboration date: 03.10.2012
Update date: 02.02.2017

Edition 3

	health harmful factors at workplace (Dz.U. 2011 No 33 pos. 166).
8.2 Exposure controls	
8.2.1 Appropriate engineering controls	Provide proper room ventilation during work with mixture and individual protection measures.
8.2.2 Individual protection measures	
• Respiratory protection	Not required.
• Skin protection	Working clothes with long sleeves and legs with proper protection preventing the material from getting underneath. Waterproof, long working footwear. It is advisable to use the clothing and footwear resistant to this mixture. Hand protection: In case of possibility of contact with the product use protective gloves. Wear protective gloves on clean hands only. After taking the gloves off wash and dry hands thoroughly. Protective creams for hands recommended. Used or defective gloves should be immediately replaced with new ones.
• Eye/face protection	Eye protection – protective goggles protecting against sprays of chemical substances (meeting the standard EN 166).
• Thermal protection	Not required.
8.2.3 Environmental exposure control	
	Avoid contamination outflows, watercourses and soil.

Section 9. PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties	Appearance: milky-white liquid Odour: detectable, polymer Odour treshold: not applicable pH: 7-9 Melting point / freezing point: not applicable Initial boiling point and boiling range: above 100 °C Flash point: not applicable Evaporation rate: not applicable Flammability: inflammable Upper / lower flammability or explosive limits: not applicable Vapour pressure: not applicable Vapour density: not applicable Relative density: approx. 1.0 g/cm ³ Solubility: in commercial form mixable in water Partition coefficient: n – octanol/water: not applicable Auto – ignitron temperature: not applicable Decomposition temperature: not applicable Viscosity: 3500 cP (measurement with Brookfield DV II + S05 20 rpm viscometer) Explosive properties: no Oxidising properties: no
9.2 Other information	Not applicable

Section 10. STABILITY AND REACTIVITY

10.1 Reactivity	No data available.
10.2 Chemical stability	Mixture stable in standard conditions. In temperature above +150 °C decomposition of the polymer dispersion possible.
10.3 Possibility of hazardous reactions	No hazardous reaction expected for mixture as long as normally used and not mixed with other products and substances.
10.4 Conditions to avoid	Temperature above +150 °C.
10.5 Incompatible materials	Do not use containers made of aluminum, copper and alloys of these metals.
10.6 Hazardous decomposition products	Mixture does not decompose in ambient temperature.

Section 11. TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects	Not applicable.
--	-----------------

Safety Data Sheet

According to Regulation (EC) No 1907/2006

Elaboration date: 03.10.2012
Update date: 02.02.2017

Edition 3

Routes of entry:	
• respiratory	Not applicable.
• digestive	It is very unlikely so the product can get into digestive system, after exposure can happen during vomiting – choking. No toxic dose has been defined for mixture. It is recommended to get medical attention in case of swallowing. After exposure can happen during vomiting – choking.
• skin	Acts neutrally or causes slight skin irritation - after drying gets relatively hard to wash off, skin reddening can occur as a result of its removing from the surface, that is why one should remove the product as quick as possible.
• eyes	Acts neutrally or causes slight eye irritation - one should remove the product as quick as possible.

Section 12. ECOLOGICAL INFORMATION

12.1 Toxicity	Not applicable.
12.2 Persistence and degradability	Limited, depending on the biodegradation conditions.
12.3 Bioaccumulative potential	No evidence of bioaccumulation.
12.4 Mobility in soil	Mixable with water.
12.5 Results of PBT and vPvB assessment	Not applicable
12.6 Other adverse effects	Not applicable

SECTION 13. DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods	
Waste safe treatment:	If possible, recycle and return to circulation. Do not dispose to the environment with sewage or water. Product waste should not contaminate soil or water. Follow rules of Waste Act of 14 December 2012 (Dz.U. 2013 no 0 pos. 21) with further changes.
Packaging waste treatment:	Follow rules of Act on packaging and packaging waste of 13 June 2013 (Dz.U.2013 no.0 pos.888).
Waste code:	Product: 08 01 99 (<i>Wastes from the manufacture, formulation, supply and use of coatings (paints, varnishes and vitreous enamels), adhesives, sealants and printing inks - Other not listed waste</i>) Packaging: 15 01 02 (<i>Waste packaging, absorbents, wiping cloths, filter materials and protective clothing not otherwise specified - Plastic packaging</i>)

Section 14. TRANSPORT INFORMATION

14.1 UN number	Not applicable
14.2 UN proper shipping name	Not applicable
14.3 Transport hazard classes	Mixture transported in original packaging does not cause hazard in transport. Does not require special treatment and labelling according to current transport regulations.
14.4 Packing group	Not applicable
14.5 Environmental hazards	Not applicable
14.6 Special precautions for user	Follow rules of Act of 1 July 2005 on amendment of act on carriage of dangerous goods by road and on amendment of some other acts (Dz.U. 2005 No 141 pos. 1184) with further changes.
14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	Not applicable

Section 15. REGULATORY INFORMATION

15.1 Safety, health and environment regulations/ legislation specific for the mixture	
• Legal acts on the	Phrases indicating hazard type and qualifying conditions of safe use of hazardous
